Aug 28, 2016 I've just received the eye-one display 2 screen calibrator from a friend and tried to install the software, however depending on which folders I try to open I get various messages.. If I click Auto Run it says that it can't open as classic environment is no longer supported, and if I click on.. Sep 21, 2010 Yes, using Eye-One Match v3 6 2 Have since downloaded the drivers package in your link and Eye-One display 2 is now installed, thanks, appreciated.. Next job is to rebuild color settings. Closed-display mode, to be able to use the external display while your Mac's lid is closed. [Yamaha Usb Driver For Mac](#)
